

# PATIENT TIPS

Here are a few safety tips to keep in mind if you receive a recommendation for marijuana.

## Never Safe to Drive High

- It is unsafe to operate a vehicle and/or heavy machinery under the influence of marijuana.
- Driving a car under the influence of marijuana is not safe for the driver or the passengers.
- Remind your children not to ride in a car if the driver has been using marijuana.

## Accidental Consumption

- If a child consumes marijuana, it can make them very sick. Look for problems walking or sitting up, trouble breathing, or drowsiness.
- If you believe a child has accidentally consumed marijuana, call the Poison Control Hotline, 1 (800) 222-1222. If symptoms are serious call 911.

## You're a Role Model

- Actions speak louder than words. It is not recommended to use marijuana or other substances (prescribed or not) around children.
- Set a good example and create a safe environment where children don't have access to marijuana.

# SAFE STORAGE

While it's important to follow proper dosing instructions, it can be just as important to keep your marijuana safe and stored properly.

Store marijuana in the original packaging

Keep marijuana out of reach of children and pets

Keep marijuana stored safely out of sight

Keep marijuana in a locked container
